# Combo-System Energy Savings Analysis

The BAXI LUNA Boiler is truly the most cost effective system for providing heating & domestic hot water on the market today.

## BAXI LUNA Boiler vs. Tank-Based Combo System & Standard Systems

### Homeowner Savings - Monthly & 10 Year

Monthly Savings:	LUNA vs. Direct Vent Tank	\$39.98	53.53%
	LUNA vs. Power Vented Tank	\$30.99	47.17%
	LUNA vs. Furnace & HWT	\$21.35	\$38.08
10 Year Savings	LUNA vs. Direct Vent Tank	\$4,797.60	
	LUNA vs. Power Vented Tank	\$3,718.80	
	LUNA vs. Furnace & HWT	\$2,562.00	

### What is the BAXI LUNA Boiler?

The BAXI LUNA Boiler is a gas-fired wall hung combination heating boiler and domestic hot water production boiler. It is manufactured specifically for the combo-system market and, as you can see from the above, is a cost-effective alternative to standard furnace and hot water tank systems.

## Features and Benefits of the LUNA Boiler

- Wall-hung (can fit in a closet or kitchen cabinet)
- Reduces mechanical room from 100 sq. ft. to 9 sq. ft.
- Stainless steel burner
- Modulating output from 31,700 - 96,000 BTU/hr
- Automatically modulates output to meet demand
- Compact, lightweight, modern appliance
- Easy service access from front of unit
- Does not need installation of external controls or equipment
- Built-in frost protection
- Will control to independent heating & Domestic Hot Water temperatures
- Domestic system will never run out of hot water
